

# THE OCEANOS DATA CLEANSE & APPEND APP

## Optimize Your Data

Here at Oceanos, we have always believed that you need to make the best use of the data you have in your database before acquiring new contacts. The Oceanos Data Cleanse and Append App can help you facilitate this, all in one easy step. We combine social media and 3rd party data with API partners to maximize accuracy and match rates. You'll erase bad data, populate missing fields, verify existing values, and correct inaccurate information. You will look like a hero as you bring your existing database up to speed, while only paying for the data points you need.

## Get Started!

We recommend running a free Data Health Check to start, it will provide greater insight on the state of your data. When you've completed that, start a free trial, we'll work our magic on your first 2,000 records absolutely free.

### Oceanos App provides...

- **Data quality** – Our data methodology combines multiple 3rd party feeds with social media to increase accuracy.
- **High match rate** – Our approach provides deeper reach across organizations and business units.
- **A la carte pricing** – Pay only for the data points you need and match on, it's that simple.
- **Notification thresholds** – Never find yourself in a situation where you exceed your budget. You set the controls and we'll keep an audit trail down to the individual data point.

# Data Cleanse & Append

Our solution combines multiple data and social media inputs with a proprietary matching algorithm to keep your data clean and relevant. We remove bad data, populate missing fields, and verify existing values. With more accurate and complete data, you improve segmentation, lead scoring, and content alignment.
